**ENERGY
EFFICIENT
WINDOWS**

High quality 'A' RATED windows save energy
AND money off your heating bill.

It's easy to be green...

People today are far more aware of the methods and means of reducing their impact on the environment when compared to just a few years ago. This in tandem with ever-increasing energy prices, has led homeowners to make improvements to their properties which reduces their energy usage.

When you look at the infra-red images below, it is easy to see why more and more people are choosing to replace timber and even 1st generation PVC-U windows with the more energy efficient frames that are available today. It's such a simple way to save money and do your bit for the planet too.

The warmest areas seen here in red show where heat is being lost from the building.

Red areas have been eliminated after fitting energy efficient VEKA windows.

All our windows offer the highest possible level of energy-efficiency and heat retention!

Nothing but the best energy-rated frames...

We have dedicated significant time and money in developing a range of energy-efficient windows and doors, all of which are capable of achieving the highest Window Energy Rating (WER) values. The WER system allows consumers to make fair comparisons (based on energy efficiency) between different windows, much the same as with white goods such as washing machines and dishwashers.

PLUS they're low, low maintenance

Life is too short to be sanding and painting rotten old timber window frames - and even the old discoloured PVC frames need more care and attention than they used to. With our next generation PVC-U frames, all you need is a quick wipe with a warm soapy cloth. No fuss, no mess. Done!

Do your bit... and SAVE a bit!

Smaller energy bills

Replacing all single-glazed windows with A-rated windows could save you money on your energy bills.

A smaller carbon footprint

By using less fuel, you'll generate less of the carbon dioxide that leads to global warming - typically, 680kg a year.

A more comfortable home

Energy-efficient glazing reduces heat loss through windows and means fewer draughts and cold spots.

Peace and quiet

As well as keeping the heat in, new energy-efficient windows insulate your home against outside noise.

Reduced condensation

Energy-efficient glazing reduces condensation build-up on the inside of windows.

WE ARE A VEKA APPROVED INSTALLER

VEKA Approved Installers demonstrate a commitment to quality by using industry-leading systems from the world-renowned VEKA UK Group. You can be reassured that all products fitted by your local VEKA Approved Installer have been CE Marked and are provided with an Insurance-Backed Guarantee.
